Core Skills

PHP (Codeigniterl)

Node Js

React Js

MongoDB

Postgres

MYSQL/SQL

Angular 2+

Python (Flask)

Java (Spring Boot)

Docker/ Kubernetes

AWS Services

Hobbies

- Learning new skills(read/watch)
- Sport

Languages

- English
- Kinyarwanda

NSHIMIYIMANA Jean Luc

Summary

I am quick adaptable and passionate software developer with 5 years of experience in PHP (CodeIgniter) and strong proficiency in Java (Spring Boot), JavaScript (React.js, Angular), and Python (Flask). Skilled in database administration and backend/API development. Demonstrates clean, maintainable code by following best practices and programming principles. Self-motivated learner with a track record of upskilling through online platforms like Udemy and hands-on training, with a strong drive to deliver high-quality, impactful solutions.

Education

Computer Science

Jan 2016 - Oct 2018

Lycee de MUHURA

Completed secondary studies in Computer Science at Lycée de Muhura , and graduated with a Grade B on the national diploma. I Developed foundational skills in programming and problem-solving to pursue a career in software development.

Bachelor of Information Technology (In progress)

Mar 2022 – Ongoing

University of Kigali

Currently completing the final modules (last year) of my undergraduate degree in Information Technology. Throughout the program, I have gained strong theoretical and practical skills in software development, systems analysis, and IT infrastructure. I have also completed an industrial attachment, which strengthened my real-world experience and prepared me for professional challenges in the tech industry.

Working Experience

FullStack developer | Trust&CareRwanda | Rwanda

May 2019- march 2021

Developed a school management system using PHP, MySQL, and additional libraries to enhance functionality.Implemented authentication/authorization, online registration (e.g., for boarding schools like Lycée de Kigali), payment gateway integration, and student sponsorship management based on family categories.Managed fee tracking, expense management, and ensured a consistent, optimized database for fast system performance.You could visit Trust & Care Rwanda to see my work live

fullstack developer | Prime Insurance LMD | Rwanda

May 2021- dec 2022

Contributed to both backend development and database administration, including data modeling and schema design.Developed and maintained core features for prime.rw, including news, tenders, job postings, email management, and product listings.Used technologies such as PHP, MySQL, JavaScript (jQuery), Google Translate API, HTML5, CSS, and Bootstrap

Software Developer | Niksconsulting | Japan

Jan 2023 – Aug 2023

Joined the development team remotely after internship. Contributed to 7+ full-stack projects, ensuring alignment with client requirements.Worked with React.js, Angular, Node.js, Spring Boot, MySQL, PostgreSQL, and MongoDB.Designed and optimized databases, built efficient APIs with low response times, and handled troubleshooting and performance tuning across the stack.

System engineer | Iwacu Academy | Rwanda

Aug 2023 – Sep 2024

Designed and developed a comprehensive school management system using CodeIgniter and MySQL to streamline operations across departments. Key features included student information management, academics, lesson planning, attendance tracking, fee collection, online assessments, library management, HR, inventory, and report generation. Automated the student report card process, allowing teachers to input marks while the system generated complete reports. Implemented role-based access control for teachers, parents, students, office staff, librarians, and the school director, ensuring users accessed only the features relevant to their roles

Certificates

Full-stack developer | Udacity | America

Apr 2022 – Sept 2022

Built full-stack applications using Flask, React, and Angular, with backend services powered by PostgreSQL, MySQL, and SQLAlchemy.Implemented Auth0 for secure authentication and deployed projects via AWS EKS Cluster, Docker Kubernetes, and Cloud Automation with CI/CD pipelines using CodeBuild and CodePipeline. Completed certified training (see certificate).

Software Developer Intern | Japan

Sept 2022 – Jan 2023

This is Certificate conducted by Niksconsulting company. I was doing internship as software developer. My task was to design Apis in nodejs to be consumed on client side,build database structure to use on new real project.You may take by use this link https://docs.google.com/document/d/1hk2j6FjUSpiUdaf3YfADgwuiqQSvPtkMGCq3xzF_gDs/edit?usp=sharing
